1. About the College

Al-Mustaqbal University College (MUC) is a Private University College established in 2010 in Babylon Province, a well-known historical ancient city, which is located about 100 kilometers to the south of the Capital Baghdad. It has been recognized as per the Iraqi Private Colleges and Universities Amended Law No. (13) of 1996, and hence accredited by the Iraqi Ministry of Higher Education and Scientific Research. Currently, it is considered as one of the leading, multidisciplinary University Colleges whether in Iraq or in the region, and gaining a worldwide reputation as it has amazingly expanded to include more than 21 Undergraduate Programs, covering different majors in the fields of Sciences as well as Humanities. It is remarkable to note that both quantitative and qualitative aspects have been taken into consideration through the College expansion.

1.1 Vision

Al-Mustaqbal University College resolves to ensure scientific as well as academic excellence, in addition to promoting research quality with the community participation, raising meanwhile quality assurance of education as part of achieving Sustainable Development Goals SDGs.

1.2 Mission

1. Qualifying MUC graduates and employing contemporary educational technology as per the needs of the labor market.
2. Encouraging academics and creating suitable environment that could lead to promoting research, in which creativity and innovation can be inspired.
3. Communication and interaction with the local community is an essential target so as to actively contribute in its development.
4. Al-Mustaqbal University College shall excel in adopting local, regional as well as international criteria in the processes of teaching and learning so as to ensure the quality of education and academic accreditation.
5. The College adopts a strategic leadership with an administrative and service support system, all working in the spirit of a team.

1.3 Strategic Values

1. Reinforcing the culture of citizenship
2. Transparency and academic freedom
3. Commitment to morals and civilized behavior
4. Intellectual tolerance and acceptance of other opinions

1.4 Strategic Objectives

1. Developing students' scientific knowledge and technical skills as part of the new trends of educational technology.
2. Promoting the performance of faculty members by improving their scientific, educational and professional capabilities.
3. Developing education and maintaining a stimulating academic environment for the process of learning.
4. Constant improvement with the enhancement of quality assurance and applications of academic accreditation in line with the prevailing technology.
5. Finalizing the MUC infrastructure.
6. Interacting and communicating with universities everywhere in the world.
7. Promoting administrative and service systems, that have an active role in supporting education.
8. Training university leaders and human resources, developing their leadership as well as administrative skills and capabilities.

1.5 Accreditation

MUC is a fully accredited University college in Iraq by the Ministry of Higher Education and Scientific Research. Accordingly, to ensure its students a high level of academic standards and institutional performance, the college shall seek accreditation for each academic programs from internationally recognized professional accreditation agencies.

1.6 Admission Requirements

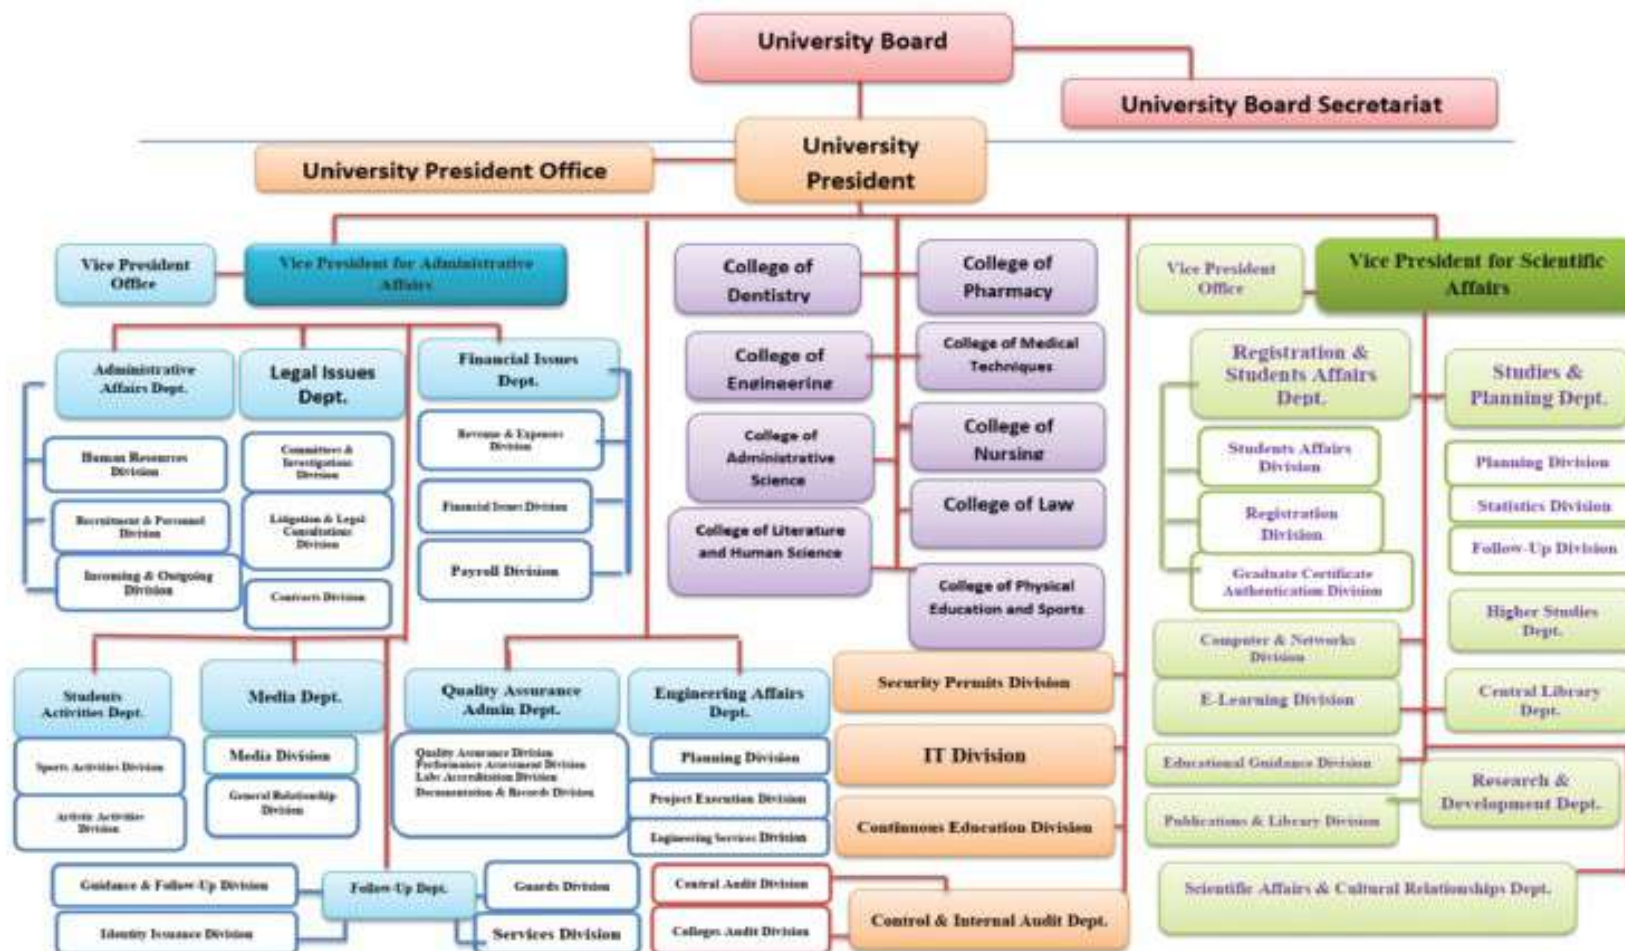

Registration and admission requirements

2.1 Dentistry

MUC Dentistry Department was established in 2017 with a distinguished skillful academic staff in addition to modern laboratories that are able to fulfill the students' needs. The department aims to graduate qualified professionals who will be able to provide the best medical and advisory services in all specialties of dental science in order to care for and enhance the community's oral and dental health. After finishing five stages of study and meeting all prerequisites, the department awards a bachelor's degree to its students.

2.2 Pharmacy

MUC Pharmacy Department was established in 2017. Many distinguished academics with vast expertise in the pharmacy field have worked in the department. Moreover, it has advanced laboratories that meet all of the criteria for high-quality teaching and learning. The department aims to prepare pharmacists with excellent scientific and professional qualifications in their field. Students are granted a bachelor's degree after passing five stages of study and meeting all required criteria.

2.3 Medical Techniques

Pathological Analysis Techniques Department

MUC Pathological Analysis Techniques Department was established in 2011 and is one of the departments that have been established since the College's inception. The department aims to meet all of the requirements that are necessary to train a generation who have the scientific abilities needed to comprehend the rapid technological progress and actively contribute to society's health. Students are granted a bachelor's degree after finishing four stages of study and meeting all required criteria.

2.4 Anesthesia Department

MUC Anesthesia Techniques Department was established in 2018, and it is regarded as one of the College's most contemporary departments, with numerous professors that specialize in the field of Anesthesia as well as distinguished useful laboratories. The department aims to train scientifically qualified staff in the field of Anesthesia who can work in the operation theatre, intensive care units, and recovery units as well as allowing them to be distinguished members of the health care team and fulfill labor market demands. Students are granted a bachelor's degree after finishing four stages of study and meeting all required criteria.

2.5 Radiology Techniques Department

MUC Radiology Techniques Department was established in 2018. It is one of the College's most contemporary departments. The department aims is to qualify competencies capable of meeting labor market demands in the fields of Radiology with an emphasis on professional ethics, achieving quality requirements, and providing services to diverse segments of society. After finishing four stages of study and fulfilling all requirements, the department grants a bachelor's degree to its students.

2.6 Optics Techniques Department

MUC Optics Techniques Dept. was established in 2021. The department aims to fulfill all of the standards that the labor market requires. Its goal is to train technical graduates with excellent scientific and technical capabilities to work in a variety of healthcare institutions, specializing in ophthalmology, lens manufacturing and in a way that benefits a wide range of people. Students are granted a bachelor's degree after finishing four stages of study and meeting all the requirements.

2.7 Medical Physics Department

Medical Physics Dept. was established in 2017. It has a remarkable infrastructure and thriving laboratories, as well as a highly qualified scientific staff and specialties. Furthermore, the department has strived to provide medical physicists with a high level of scientific and technical knowledge, allowing them to have the skills needed in delivering medical services in the field of diagnosis and treatment to fulfill labor market demands and improve the profession. Students are granted a bachelor's degree after finishing four stages of study and meeting all required criteria

2.8 Nursing

Nursing Department

MUC Nursing Department was created in 2020. The department incorporates a variety of modern laboratories as well as a variety of staff. It aims to train distinguished nurses with skills and qualifications to work in a variety of fields and have the ability to provide different services that contribute to the building and improvement of Iraqi society. Students are granted a bachelor's degree after finishing four stages of study and meeting all required criteria

2.9 Engineering departments

Biomedical Engineering Department

MUC Biomedical Engineering Dept. was established in 2016. The department is distinguished by its contemporary laboratories and highly qualified staff. The department is regarded as a linkage between engineering and medical sciences. The department aims to supply the community with specialized professionals who have primary medical abilities and can also acquire engineering skills when it comes to physical illnesses. Students are granted a bachelor's degree after accomplishing five stages of study and meeting all the required criteria.

2.10 Chemical Engineering and Petroleum Industries Department

The department was established in 2017. It has been provided with all of the essential infrastructure and qualified teaching staff. The department aims to meet the labor market's demands by preparing engineering staff with expertise in chemical engineering and oil refining. Students are granted a bachelor's degree after finishing four stages of study and meeting all criteria.

2.11 Air Conditioning & Refrigeration Techniques Engineering Department

Air Conditioning and Refrigeration Engineering Department was established in 2010. The department has a distinguished staff through which it was able to obtain regional accreditation and seeks to join the international community in the field of education quality and its outputs. Graduates will acquire the technical and practical skills of air conditioning and refrigeration systems. Students are given a bachelor's degree after finishing four stages of study and meeting all required criteria.

2.12 Computer Techniques Engineering Department

Computer Techniques Department was established in 2010. The Department has an academic staff of trained and experienced teachers with considerable expertise in the field of computer science, as well as contemporary labs that fulfill all of the students' necessities. The department aims to train renowned and advanced engineers with technical education as well as provide them with the latest scientific methods.

2.13 Building & Construction Techniques Engineering Department

In 2012, the department was formed as Civil Engineering, and in 2017, the title was changed to Building and Construction Techniques Engineering. It is a sup-specialty of engineering that studies, designs, and analyzes structures such as buildings, roads, bridges, airports, ports, and dams. Since its establishment, the department aims to train technical engineers who are capable of using modern techniques and processes in the design, execution, and maintenance of all engineering projects. Students are granted a bachelor's degree after finishing four stages of study and meeting all requirements.

2.14 Medical Devices Techniques Engineering Department

MUC Medical Devices Techniques Department was established in 2020 with modern laboratories and equipment. The department aspires to graduate highly skilled specialized engineering staff who are acquainted with medical devices engineering, design, and maintenance. Students are granted a bachelor's degree after accomplishing four stages of study and meeting all requirements.

2.15 Law Department

Law Department

Law Department was established in 2012. Since its establishment, the department was aimed to provide the job market with a generation capable of understanding various legal laws and to contribute to community service by developing legal knowledge. Students are granted a bachelor's degree after finishing four stages of study and meeting all requirements.

2.16 Administrative Science

Business Administration Department

The Department was established in 2012. It has specialist staff. The department has worked to prepare graduates who have experience in business science and knowledge, as well, encouraging the students to use modern technologies and programs in the business environment in order to achieve excellence and superiority in the fields of administrative and educational sciences.

2.17

Accounting Department

The department was established in 2017. It has specialist scientific and administrative staff. The department aspires to provide the students with the required skills and knowledge and them able to contribute to the labor market. Students are granted a bachelor's degree after completing four stages of study and meeting all criteria.

2.18 English Language and Literature

Department of English Language & Literature

The department was established in 2016. It has several training halls. It aims to develop a generation of graduates who will be capable of spreading sports culture and raising sports awareness among community members. Students are granted a bachelor's degree after finishing four stages of study and meeting all requirements.

2.19 Physical Education and Sports

Physical Education and Sports Science Department

The department was established in 2016. It has several training halls. It aims to develop a generation of graduates who will be capable of spreading sports culture and raising sports awareness among community members. Students are granted a bachelor's degree after finishing four stages of study and meeting all requirements.

2.20 Media Department

The Department was established in 2020. The department aspires to provide the best possible scientific and study materials which can help the students in acquiring modern scientific and media skills. Students are granted a bachelor's degree after finishing four stages of study and meeting all requirements.

2.21 Intelligent Medical Systems

The Department of Intelligent Medical Systems is distinguished at the local and international levels in the field of supporting and developing health systems, developing scientific research, meeting the needs of government institutions and the labor market in order to improve the quality of health care, and developing medical digital software.

2.22 Prosthetic Dental Techniques

The Department of Prosthetic Dental Techniques at Al-Mustaqbal University College was established at the start of the Academic Year 2023 – 2022, with the intention of graduating technicians who could skillfully do their job in the various hospitals, specialized centers and laboratories where the main focus is to produce materials required for the dental industry.

3. Sustainable Development Goals (SDGs)

Recently, MUC has given great consideration to achieving a good position towards the sustainable development goals (SDGs) due to our belief in realistic support for the local communities. This belief was strengthened by the existing challenges of poverty, inequality, climate change, ecology perseverance, peace, and justice. Hence, we have already achieved part of our plans in this matter, such as :

1. Within the SDG 7 (Affordable and Clean Energy), several renewable energy (solar) projects have been installed in the countryside and inside our college free of charge.

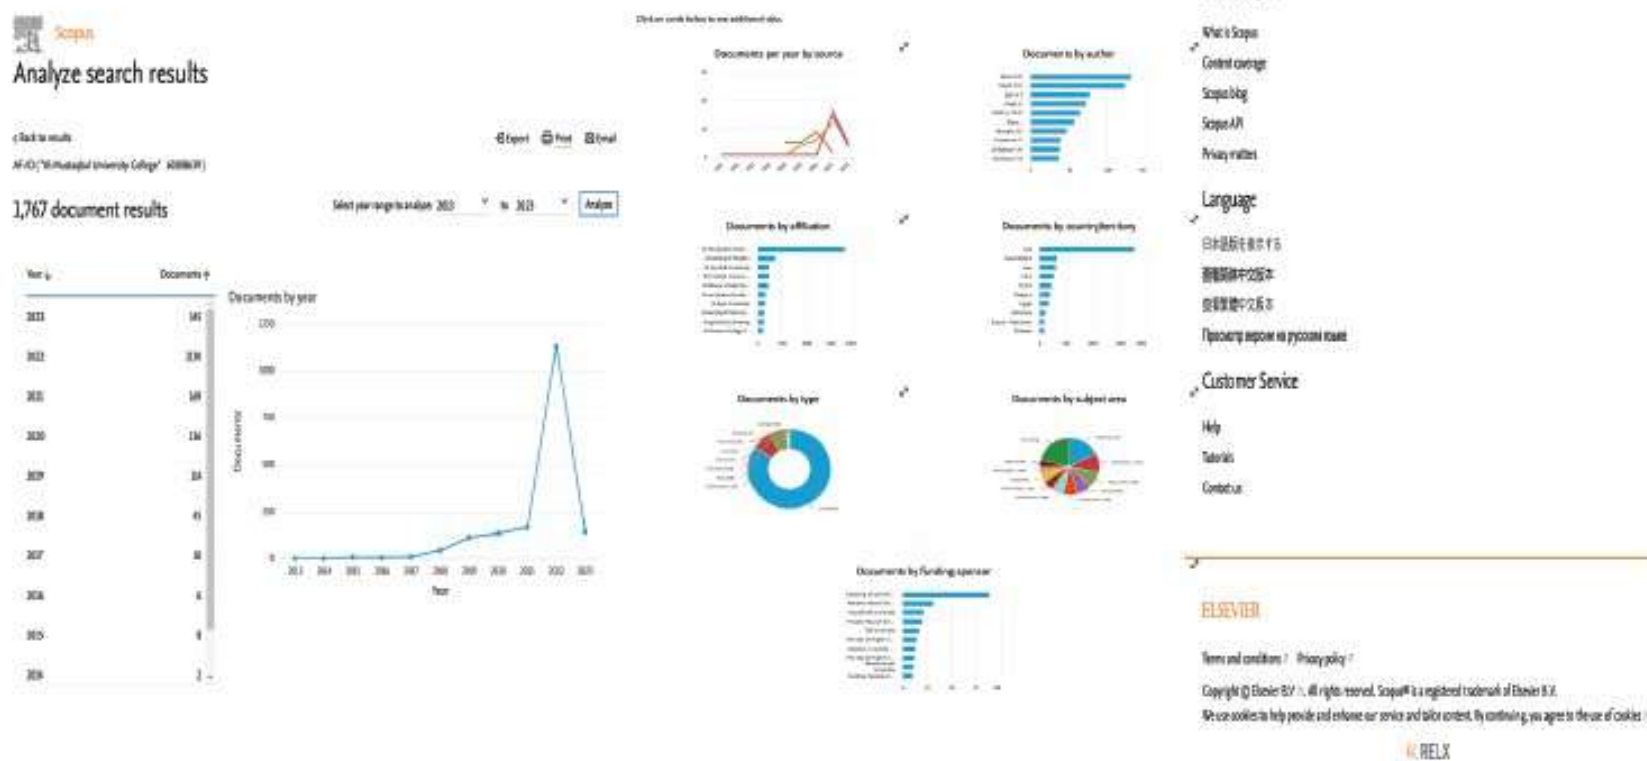

2. Within the SDG 17, (Partnerships for the Goals), partnering with local Iraqi universities to organize the University Leadership Conference and other cooperation and partnerships with International Universities and Organizations.

4. Research Activity

Al-Mustaqbal University College is actively involved in various research activities. As the college hosted and contributed to many conferences. Further, the final year students are actively involved in research projects, performing hands-on research under the supervision of the academic staff. Also, the academic staff is encouraged to publish their research outcomes in indexed journals and proceedings as well as present them at national and international conferences. In addition, all departments conduct a series of seminars according to their specialization under the supervision of qualified researchers to share and discuss new research ideas.

5. University Ranking

MUC has successfully entered the global The Times Higher Education Impact Ranking "THE Impact Rankings" that assesses universities according to the United Nations' Sustainable Development Goals (SDGs). Al-Mustaqbal University College achieved an advanced position among the Iraqi universities. MUC successfully achieved a top position through UI GreenMetric World University Ranking "UI GreenMetric" MUC recently became one of the QS classification universities, as well as Webometrics, Round University Ranking RUR and U-Multirank.
